Budget Estimates

1954

(Showing actual obligations for fiscal year 1952, estimated
obligations for fiscal year 1953, and estimated
obligations for fiscal year 1954
on the basis of the Budget estimates.)

PREFACE

The Project Breakdown comprises detailed obligations and allocations by financial and work projects conducted under appropriations and other funds shown in the annual Budget. Financial projects are the fields of work or programs generally included in the "Obligations by Activities" portion of the Budget schedules. Work projects are lines of activity, or groups of related lines of activity, conducted under the various financial projects.

This material has been compiled on the basis of the appropriation and project structure proposed in the 1954 Budget estimates, necessitating in a few instances adjustments in 1952 and 1953 project amounts for purposes of comparability. The amounts shown for financial and work projects in these detailed statements are not based in all cases upon accounting records that are formalized by specific account classifications.

The material contained in this volume has been arranged in two parts. Part I is composed of detailed statements of obligations by projects (where budgetary projects have been established) for each bureau or agency of the Department. Part II is composed of detailed statements of project obligations by geographic locations for those funds of the Department for which such a breakdown of obligations is readily available.

The amounts shown under "Allotments and other funds" include only those amounts which, by November 30, 1952, were actually received or programmed for 1953 or 1954. Since work for other agencies is performed on a service basis, at the request of those agencies and for their benefit, it is not practicable to estimate in advance the amounts to be received in most cases.

a/ Under the authority contained in the 1952 and 1953 appropriation acts this work has been financed through transfers of funds from Commodity Credit Corporation, subject to later reimbursement by appropriation or cancellation of notes. The 1954 Budget Estimates propose to continue language authorizing transfers from any funds of the Department to finance emergency disease eradication programs, and propose language authorizing the Secretary of the Treasury to cancel notes issued by the Commodity Credit Corporation to the Treasury in the amount of \$7,057,575 for costs incurred in fiscal year 1952 (including interest thereon through June 30, 1953) in connection with the program for foot-and-mouth disease eradication. In fiscal year 1954 no funds would be transferred from CCC or other Department accounts except in case of an emergency.
